1. Costs and amounts shown are for guidance only and should not be relied upon as the actual costs for specific vision care administration services. The estimated costs may be higher or lower as they are calculated based on national average cost and frequency data with an understanding of provider networks. These costs are not intended to reflect your exact costs for services and are subject to change based on your coverage, benefits, and authorization for services. The information presented does not indicate medical advice, actual costs, guarantee of payment, prior approval for services, or judgment of a claim. If you have a vision plan, be sure to review your plan's current Schedule of Benefits for your specific coverage details.
2. Your actual savings from enrolling in a vision plan will depend on various factors, including the plan chosen, plan premiums, number of visits to an eye care professional by your family per year, and the cost of services and materials received. Be sure to review the Schedule of Benefits for your plan's specific benefits and other important details.
